1. Write down the times when you prompt your daughter to use the potty.
2. Prompted reminders are discontinued once your daughter has initiated going to the potty twice.
3. If your daughter has urinated in the potty is but has not initiated going by herself, increase the time between the prompted reminders and change your language to suggestive or just query to ensure that she knows what is expected i.e. ask if she had to go potty, where would she go?
