1. Write down the times when you prompt your son to use the potty.
2. Prompted reminders are discontinued once your son has initiated going to the potty twice.
3. If your son has urinated in the potty is but has not initiated going by himself, increase the time between the prompted reminders and change your language to suggestive or just query to ensure that he knows what is expected i.e. ask if he had to go potty, where would he go?
